My friend and co-author Jan Ozer has just released a huge, 340 page PDF document entitled '**Critical Skills for Streaming Producers**'. It is accompanied by a series of video tutorials and materials which will help you hit the ground running when it comes to on location video shooting, lighting, choosing a codec, encoding and much much more.

You can find **more info** on **this page** which also contains a **link to purchase**. I'll definitely grab myself a copy.
