**Influxis** are now offering hosting for the full version of FMIS 3 on **their website**, and have upgraded their plans' specs accordingly. They have also introduced a new tier of shared hosting plans called Enterprise for contract-free , large scale needs featuring resources just shy of going to a full dedicated environment. Any current customers who are on a FMS 2 account, can request to upgrade their account to FMIS 3 for free. Customers also get access to a variety of turn-key applications, including the newest TV station application, and you can find the **admin demo here**.
