There's a live online presentation about the new Strobe Media Playback player coming up tomorrow at the OSMF user group. Ovidiu Eftimie from Adobe's Strobe Media Playback team will be presenting the features of this new versatile "ready-to-go" video player. There'll be an insight into the roadmap for future additions to the player, and time to ask questions.

The presentation starts at 12:00 (West Coast), 20:00 (London), and can be accessed by anyone through this URL <http://experts.na3.adobe.com/osmf>

You can find out more about Strobe Media Playback at <http://labs.adobe.com/technologies/strobemedia>
