I'm very happy to be able to offer this **Flex Whiteboard Component** for sale as of today. It is a complete rewrite of our popular Flash Whiteboard component which has been integrated into projects such as **DimDim** and **Aspiringkidz**. We hope that the Flex component will have a similar success. I truly believe that this is the best Flex based whiteboard component for FMS available today and it has a massive feature set including many **public APIs** and an architecture that allows you to specify any Canvas component in Flex as the whiteboard surface. Images are supported and we

have even added Flickr integration.

I've set up a **dedicated page** with more information right **here**.
