My good friend **Tink** (he's into this type of filthy stuff ;-)) just pointed me towards the **Diesel Intimate 'Lockin' site**. There you can watch a bunch of teens doing, well, not much really.

Anyways the nice thing is that the site is using Flash Video (apparently via Vitalstream) to push the *live* video out. I've got a feeling that we'll be seeing a lot more of this sort of stuff this year. I wonder how they are pushing the video... (btw we're trying the new Flash Media Encoder at

the **LFPUG meeting** this evening).
