The wait is over: the long awaited book 'Programming Flash Communication Server' has been released. You may already know that **Brian Lesser** is the main man behind this, backed up by a crew of Flashcom allstars such including **Peldi**, **Robert Reinhardt**, **Justin Watkins** and **Joey Lott**. Yes, wow.

I am not sure what else to tell you except **GO AND BUY IT** and once you have placed your order check out the **book's website** which features a sample chapter, articles and sources. Congratulations to everyone involved!
