Netromedia
www.netromedia.com

Netromedia provides a complete range of live and on-demand streaming solutions, serving a diverse client base - from traditional enterprise broadcasters to individual internet streamers. Our streaming services are optimized to perfect the key elements of the online streaming process: Acquisition, Distribution and Analysis. We have pioneered most of the streaming technology that operates our systems today and our capital investments in R&D are in a class by themselves.

Influxis
www.influxis.com

Influxis is a specialist service provider and official Adobe hosting partner for the Adobe Flash Media Interactive Server. FMS allows for video streaming, live interactive presentations, cam chat, and more. It takes minutes to get started by simply embedding a Flash application into any current website. No need for any special setup, configuration, or switching web hosts. Custom-configure a FMS hosting plan or choose any pre-configured hosting plan specially priced for various levels of use. Influxis provides end users with extremely reliable connections and increased latency speeds via an international network of FMS servers located throughout the U.S., U.K., and Germany. Every account includes an account management interface with a file manager, bandwidth reports, and access to our Flotools FMS component set and complete library of pre-built Flash applications (including FLA source files for customization and branding).

Sapphire
www.sapphire-group.net

Sapphire are broadcast specialists who provide digital delivery solutions for Radio, TV Simulcast, Web & IPTV, including "pay-per-view" services. Sapphires Live & VOD platform is built around Kaltura & Flash Media server & we have delivery agreements with the worlds largest FMS CDN for the delivery of live events. Sapphire can also offer production, host broadcaster & broadcast engineering services to compliment your digital delivery solution.

Uvault
www.uvault.com

Uvault.com is dedicated to provide hosting services for applications using Macromedia Flash Communication Server MX. Catering to a growing global community of Communication Server developers, Uvault.com scalable hosting plans are tailored to support from individual developers to large enterprises seeking to deploy a scalable array of dedicated servers. Uvault.com servers located in N. America and in Europe provide high quality internet connection via NTT/Verio global advanced tier-1 network.

Imediasee
www.imediasee.com

Imediasee delivers stunning high resolution true Flash video streams at an exceptional price - without monthly fees, setup fees, overage charges or long-term commitment. Imediasee, a Wowza streaming partner, offers live and on-demand streaming services, volume hosting packages, multi-bit rate video encoding and custom application development. Our Dynamic Delivery™ feature adds automatic bandwidth detection and bit rate adjustment to the advantages of Wowza's media server ensuring instant video loading, higher bit rates, with no buffering or delays, even for feature length movies.

Wowza Media Systems
www.wowzamedia.com

The Wowza™ Media Server is an industrial strength cross-platform Flash® server that gives you the performance, flexibility and features you need to dramatically improve Flash streaming economics. It interactively streams video, audio and data to the ubiquitous Adobe® Flash Player for a wide range of applications, including video-on-demand, live video delivery, video recording and chat. The Wowza Media

Server makes Flash streaming affordable for organizations of all sizes - from individuals and enterprises, to hosting companies and CDNs. Multiple editions are available to meet your specific needs, including the unlimited connections edition and high-volume licensing.

NetMasters by

Flashhosting
www.flashhosting.nl

Flashhosting.nl offers FlashCom Hosting in various ways. It delivers shared as well as dedicated and managed FlashCom Hosting. One of the unique ideas behind Flashhosting.nl is the idea of the way you can set up your own shared environment. Also you never pay too much because you only pay the data traffic you really use. Flashhosting is the no. 1 in The Netherlands regarding Macromedia Hosting with FlashCom, ColdFusion and Jrun and one of the few in the world hosting FlashCom on Red Hat Enterprise and Windows 2003 Server. Experience it yourself by asking a FCS-account of 14 days for free!

InterMedia Solutions
www.intermedia-solutions.net

InterMedia Solutions provides Streaming and Software Services for the creation and publishing of professional Video Streams, RichMedia presentations and interactive Webcasts.

Our software solution **MultiSource-WebCast** offers you an efficient tool for the production, control, recording and distribution of live webcasts. The software makes it possible to mix any external or internal media source such as the video of a speaker and a PowerPoint presentation. In addition, texts, images, logos, banners and much more can be merged at any point. ONE single synchronous media stream is output, which can be encoded in any format, such as Flash, Windows Media, or Real, saved and then published as a live stream on the internet.

Choose our MDN (**Media Delivery Network**) for a guaranteed high performance delivery of your live and on-demand video webcast, including player, encoder and free support.

Velocix
www.velocix.com

Velocix offers the broadest and most innovative range of digital delivery services available today. Our global Content Delivery Network (CDN) provides an Internet fast lane for digital assets like video, music, software and games. With Velocix, high quality streamed video plays uninterrupted from start to finish and file downloads complete without failure in a fraction of the time. For more information, visit www.velocix.com.

StreamUK
www.streamuk.com

European specialists in Flash hosting and system integration based on Flash technology, provisioned by the latest Macromedia technology. Stream UK (<http://www.streamuk.com>) was established in 2001 and heads the group that includes Stream Spain (<http://www.streamspain.es>) and Stream Italy (<http://www.streamitalia.com>). The impressive client list has AOL, BBC, ITV, Virgin Media and Yahoo as active Flash-based projects. Underpinning the hosting capability is a powerful transcoding farm capable of converting most current digital formats into the latest Flash codecs.

Limelight Networks
www.limelightnetworks.com

Limelight Networks, Inc. is a content delivery partner enabling the next wave of Internet business and entertainment. More than 1300 Internet, entertainment, software, and technology brands trust our robust, scalable platform to monetize their digital assets by delivering a brilliant online experience to their global audience. Our architecture bypasses the busy public Internet using a dedicated optical network that interconnects thousands of servers and delivers massive files at the speed of light -- directly to the access networks that consumers use every day. Our proven network and passion for service assures our customers that every object in their library will be instantly delivered to every user, every time. For more information, visit www.limelightnetworks.com.
