A few months ago I put together a website called **BanterTV.com**. BanterTV.com aggregates the **BBC iPlayer** Live streams and adds a **chat interface** to each 'channel'.

As today is Inauguration Day for president Obama it may be appropriate to announce my little **project** here and invite UK viewers (iPlayer streams are UK only) to join me on BBC 1 where Huw Edwards and Matt Frei present live coverage from Washington DC as Barack Obama is sworn in as 44th President of the United States and addresses the nation.

Watch the event live on BanterTV.com. Hope to see you there. Coverage in the UK starts at 4pm GMT.
